

Adjustable-Arm

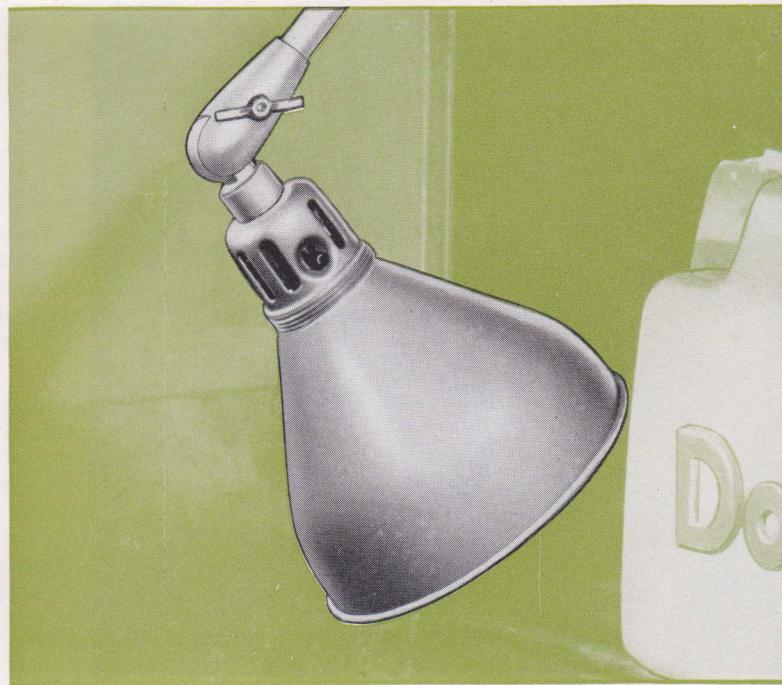

**bring
low-cost
aid to busy
work stations**

Air-Cooled Incandescent Lamps

... Either
Side-Mounted Reflector (above)
or
Top-Mounted Reflector (right)

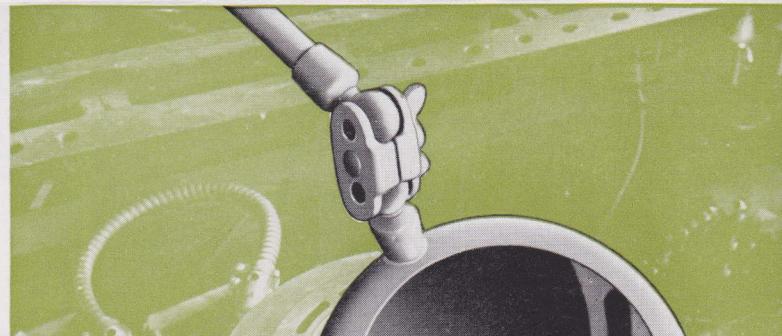

Now light each work station fully with a lamp of Dazor quality at rock-bottom cost. The Adjustable-Arm design gives plenty of reach—either 31-inch or 20-inch maximum extension. Choice of reflector types lets the operator aim light directly on the tool or job, regardless of any recess or offset. Tension controls hold fast against vibration and shock. See other details inside.

DAZORS

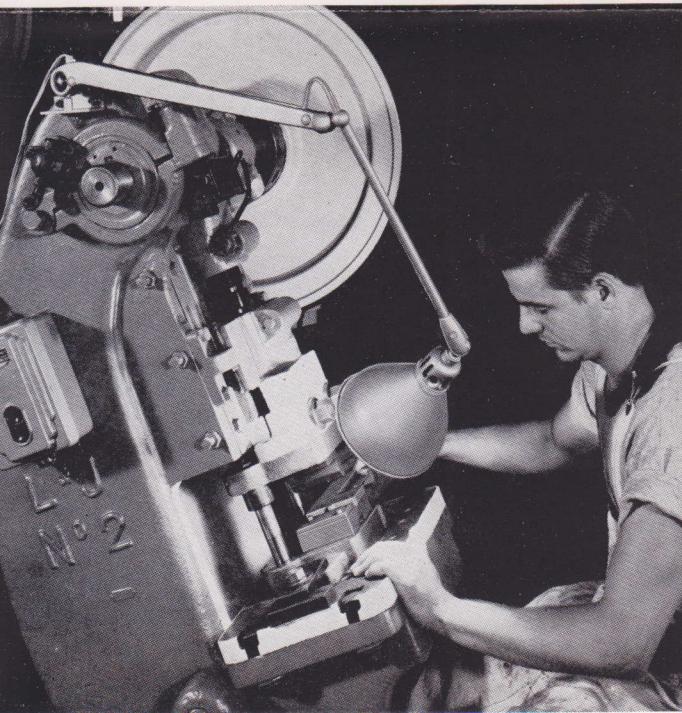

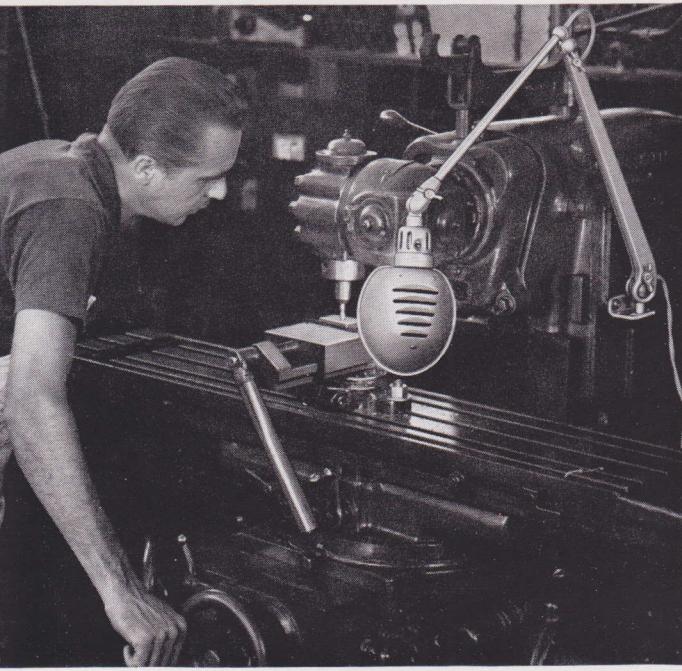

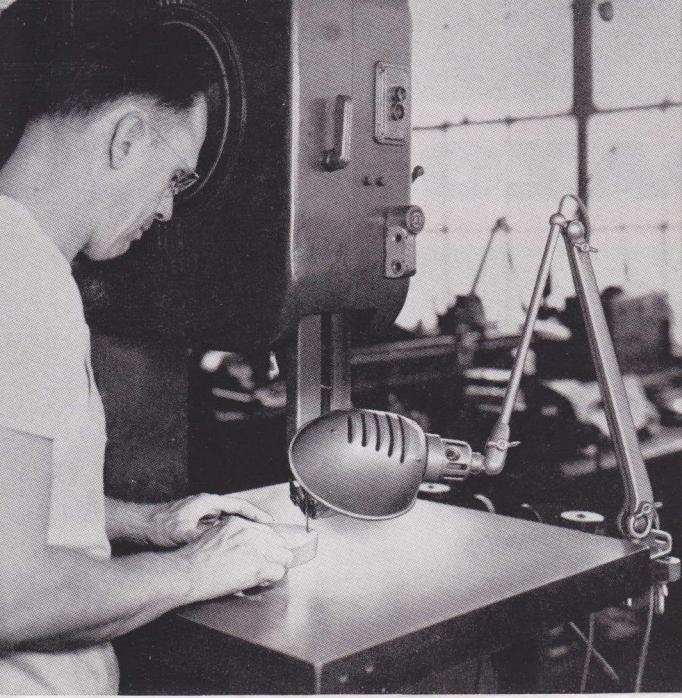

Magnifier with 5-Inch Lens (right)

For close inspection and periodic checking, where separate lighting is supplied, mount this easy-to-place Magnifier near the working zone. It uses the regular Dazor Adjustable Arm—31-inch or 20-inch—and stays in the position set, leaving hands free. See page 4.

The **SOLID** buy |

... cool ... safe ... efficient ... durable

Be critical when you select lamps for machine and bench installation. These Adjustable-Arm *Air-Cooled* Dazors have changed the picture of what you can get in the low-price range. Here's the real seeing assistance of high-intensity lighting placed exactly where each employee wants it, without the penalty of excessive heat. Either type of reflector (side-mounted or top-mounted) may be handled freely without fear of being burned.

Feel the heft of this Dazor and examine the arms, ball joints and base. Then you'll understand why the fixture mounts solidly on either a horizontal or vertical surface and keeps the light steady until purposely moved. Examples of Dazor attention to quality, shown on the opposite page, underscore the value built into this low-cost industrial lamp. Which models will fit your production needs best? We'll be glad to help you decide.

Adjustable-Arm

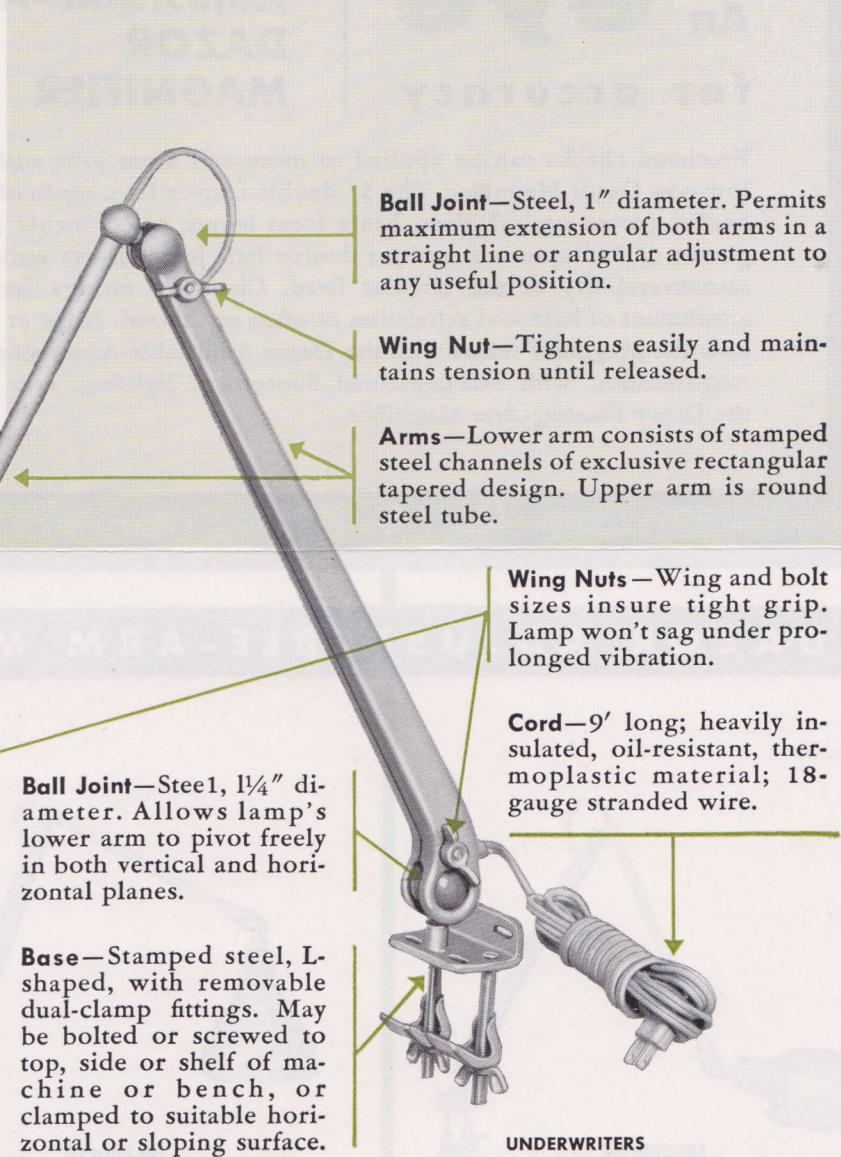

Air-Cooled

DAZOR LAMP

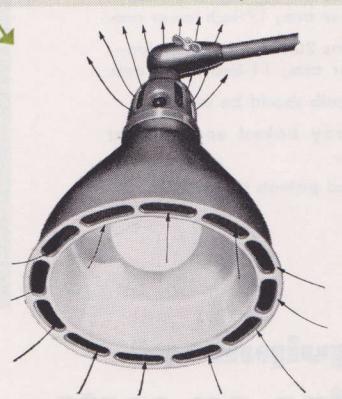

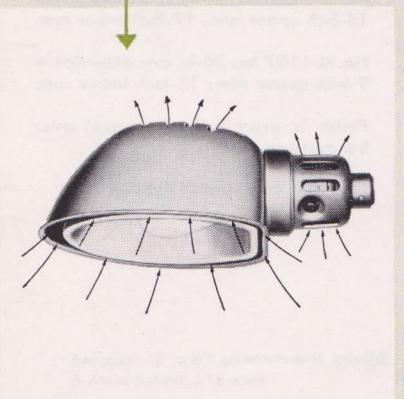

SIDE-MOUNTED
REFLECTOR

Dazor Patented Swivel Joint—Reflector assembly pivots in knob; knob rotates around upper arm. Light can be beamed in any direction, any recess.

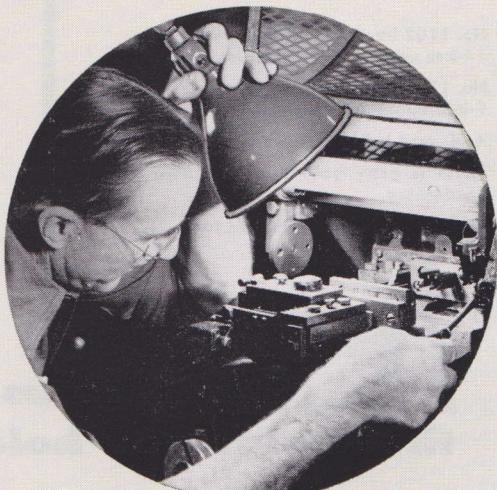

UNDERWRITERS
APPROVED

Choice of Reflectors—The sketches below show how natural ventilation cools each type. It carries away excess heat from bulb via air chamber between outer housing and inner reflector. The aluminum inner reflector is highly polished, then coated for protection from oxidation, easier cleaning.

**Adjustable-Arm
DAZOR
MAGNIFIER**

Precision checks can be applied to more and more jobs with this low-cost Dazor Magnifier. The 5" double-convex lens, made of high quality crown optical glass, has a focal length of 13 inches and a power of 3 diopters. A unique double ball joint allows unlimited maneuverability of the circular head. Clamp-on fittings facilitate attachment of base and relocation as often as desired. Note, at right, how the Magnifier teams with the Dazor Adjustable-Arm Lamp. For magnification with self-contained fluorescent lighting, ask about the Dazor Floating-Arm Magnifier.

DAZOR ADJUSTABLE-ARM MODELS AND PRICES

AIR-COOLED
INCANDESCENT LAMP
SIDE-MOUNTED REFLECTOR

\$10 50

(Western Price....\$11.50)
Prices do not include bulb

No. 1102 has 31-inch arm extension—
14-inch upper arm; 17-inch lower arm.
